I am excited to submit my application for the 6-month internship program at Adler. As a B.Tech Computer Science student from Banasthali Vidyapith, I have honed my technical and leadership skills through various projects and roles, making me eager to contribute to and learn from your esteemed organization.

Why have you chosen to join Adler? I have chosen Adler because of your innovative approach to technology and your commitment to creating impactful solutions. Adler's reputation for fostering a collaborative and dynamic work environment aligns perfectly with my career aspirations. The opportunity to work on cutting-edge projects with a team of highly skilled professionals is exactly what I am looking for to further my growth and development in the field of computer science.

Why should Adler want to work with you? Adler should consider me as a valuable addition to your team because of my strong technical background and hands-on experience with various programming languages and frameworks. I am currently working at Barclays as a Technical Summer Intern and working on Python Automation Tools. I have developed an Analysis of EEG Data using Deep Learning algorithms to detect brain abnormalities, showcasing my ability to apply advanced concepts to real-world problems. Additionally, my experience in developing a GUI with login pages using HTML, CSS, and MySQL demonstrates my practical skills in web development. My coursework in DBMS, OOPs, and Data Structures further solidifies my technical foundation. My role as a core team member of the Workshops Team at MAYUKH and Media Head at TEAM NAYAN highlights my leadership and communication skills, making me well-suited for a collaborative work environment.

Are you crazy in some aspects? In some aspects, I am driven by an intense curiosity and a desire to push boundaries, which might be perceived as "crazy." For instance, I am passionate about diving deep into complex problems and exploring unconventional solutions. This trait has often led me to discover innovative approaches and make significant contributions to my projects. My willingness to embrace challenges and think outside the box sets me apart and drives my continuous learning and growth.

What important truth do very few people agree with you on? One important truth that I hold, which very few people agree with, is that failure is not just a stepping stone to success, but a crucial component of it. Many view failure as something to be avoided, but I believe that embracing and learning from failures is essential for true innovation and progress. My academic and project experiences have taught me that each failure provides valuable insights and opportunities for improvement, ultimately leading to greater achievements.

I am confident that an internship at Adler will allow me to leverage my skills and passion for technology while contributing to your ongoing success. I am attaching my resume for your reference and look forward to the opportunity to discuss how I can be a valuable asset to your team.
